

BUDDA[®]

AMPLIFICATION

"A high-gain amp maker to be reckoned with." —*Guitar Player*

“Purple, proud and punchy.”

—*Vintage Guitar*

Tone is an elusive thing. Guitar players know that it can be hard to define, and even harder to find. But when you get it, you never look back.

Budda® Amplifiers specialize in creating unique tonescapes that balance warm tube gain stages with defined, responsive attack.

Our proprietary Dual Class Hot Bias Circuit combines the best characteristics of class A and class AB operation to produce lively tones defined by massive dynamics and complex overtones in second and third harmonics, with plenty of separation to let your guitar sing.

The breakthrough tone of Budda Amplifiers sparked the low-wattage revolution in guitar amps more than a decade ago with the hand-wired Budda Twinmaster™. The innovation continues today with the Superdrive™ II Series, which combines our famous power, punch and clarity to outperform and outclass other amplifiers.

We constantly engineer forward, maintaining a focus on high performance in our products. Our attention to detail is one of the reasons why Budda has received coveted awards such as the *Guitar Player* Editor's Pick for tone and workmanship.

BUDDA AMPLIFIERS & CABINETS ARE DESIGNED AND BUILT IN THE U.S.A.

BUDDA[®]

MARK NASON[®]

LUXURY EARNED

THE BUDDA® MN-100™ IS THE CONVERGENCE OF THE MODERN PRECISION OF BUDDA AMPLIFIERS AND THE OLD-WORLD ARTISTRY OF MARK NASON® ITALIAN LEATHERS. FOR THOSE WHO CRAVE BOTH TONE AND LUXURY, THE MN-100 IS SIMPLY THE BEST GUITAR AMPLIFIER MONEY CAN BUY.

MN-100™ Head

This three channel, 120 watt amplifier is driven by seven two-stage 12AX7 tubes, four EL34s and two 5U4Gs, allowing the MN-100 to cover an extremely broad range of tone. Each channel features isolated preamp tubes and independent Reverb, Resonance and Presence controls, along with Budda's trademark OVER-BOOST™ circuit. Each channel also features independent true bypass effects loops with trailing decay that can be configured in series, parallel or global operation. The master section features dual volume control for additional boost. Powered by dual 5U4G rectifier tubes and a solid state rectifier, Budda's patent-pending PowerPan circuit allows the unprecedented ability to pan between full tube or solid state rectification, drastically increasing the tonal pallet. Designed with the touring professional in mind, features such as Silent MIDI LDR switching throughout the amplifier allow the MN-100 to easily integrate into any professional rig. From feature set to fit-and-finish, the MN-100 redefines the very concept of the guitar amplifier.

MADE IN THE USA

MN-100™ Head Specifications

- 120 watts into 16, 8 or 4 ohms with half-power switch
- 3 channels, clean, rhythm and lead
- 4xEL34 120w power section, 7x12AX7 preamp section and 2x5U4G rectifier tubes
- Power amp can use 6L6GC or EL34 tubes (plus KT66, KT88, 5881 and 6CA7 with re-biasing)
- Rectifier can use 5U4, 5AR4 or GZ34 tubes
- Patent-pending PowerPan rectifier selector knob
- Custom Italian leather covering by Mark Nason®
- Separate three-band passive EQ on each channel
- Silent LDR MIDI channel switching
- High quality audio grade resistors and poly caps throughout
- Massive custom designed output transformer
- Multi-function MIDI footswitch included
- Separate Resonance & Presence controls on each channel
- Master Volume and Master Boost
- OVER-BOOST™ stompbox-style lead boost on each channel
- Separate spring reverb control on each channel
- High and Medium 1/4" inputs
- Slave output/Power amp input
- Separate true bypass effects loops on each channel with send and return level adjustments. Channel 2's loop can be used as global loop
- Ceramic tube sockets

MN-412™ Enclosure

- Custom Italian leather covering by Mark Nason
- Solid pine with finger-jointed corners
- Four custom-designed 12" Budda® Phat loudspeakers
- Closed back

**“For 18 watts, this sucker is loud, punchy
and big sounding!”** —*Guitar Player*

The Superdrive™ 18 is a low-wattage powerhouse. Designed for clubs and studios, this lightweight, two-channel amplifier offers sparkling rhythm complexity with super-sensitive high-gain articulation. There's nothing more organic than the tone of EL84 power tubes being pushed to their limits, with lush sag and rewarding sustain.

BUDDA AMPLIFIERS & CABINETS ARE DESIGNED AND BUILT IN THE U.S.A.

"If you are looking for an amp that can bring out the best in your playing style, the Superdrive may be the ride of your life." —Guitar Player

BUDDA AMPLIFIERS & CABINETS ARE DESIGNED AND BUILT IN THE U.S.A.

Like our 18-watt on steroids, there's a good reason why our Superdrive™ 30 earned the nickname "The Dirty 30" around Budda HQ. High-gain aficionados will find plenty of inspired gain, simultaneously sweet and aggressive, while the Rhythm channel nails a sparkling tone with chiming harmonics and a touch-sensitive circuit that allows even the most subtle jazz player the chance to show his chops.

CABINETS

**Specially Voiced, Premium
Budda Loudspeaker Cabinets**

BUDDA AMPLIFIERS & CABINETS ARE DESIGNED AND BUILT IN THE U.S.A.

Budda loudspeaker enclosures are hand wired with the highest quality components to ensure that nothing in your tone gets lost in translation.

4x12

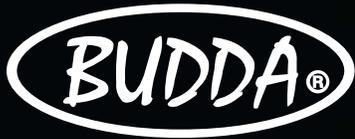

28" x 14" x 28.75"
91 lbs.

When you want to move a lot of air and cut through the mix, the Budda 4x12 is the answer. We fine-tuned this enclosure to coax tremendous amounts of bottom and midrange punch from the power section of our high-wattage amps.

2x12 Half and Closed Back

28" x 14" x 18.5"
55 lbs.

The Budda 2x12 extension cab will fit nicely underneath your combo or in a stereo rig. The corners are dovetailed and the cabinet is solid pine, which offers lots of midrange punch. Loaded with our standard Budda Phat 12" loudspeakers. Available in an open and closed back configuration.

BUDWAH™

The Budwah™ is one of the most sought-after wah-wah pedals ever made, designed with tightly focused tone sweep and an outstanding vocal-like quality. At bass settings (heel rocked back), the Budwah tone is thick and honky without losing clarity of the note. When fully depressed, the highs roll off to a frequency that isn't piercing like many other wahs.

We also incorporated a hard-wire bypass that takes the effect completely out of the circuit

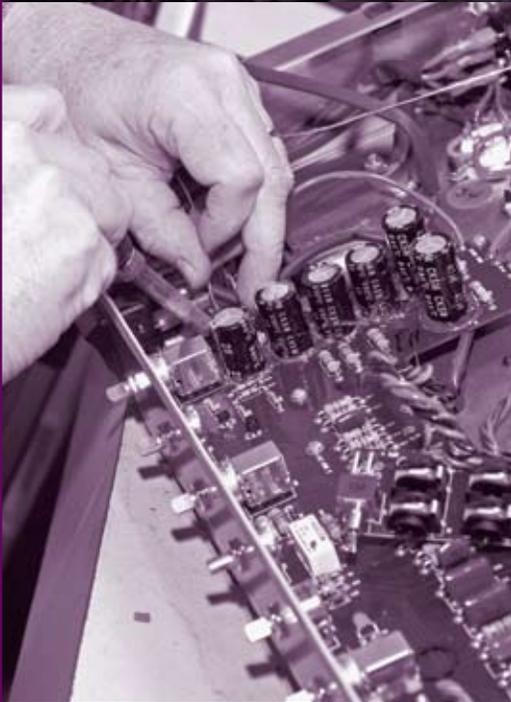

when switched off, allowing your signal path to remain pure and in no way compromised like vintage-style wahs. Our custom coil inductor is a modern and enhanced version of the classic Italian Fasel inductor, which enhances the voice-like effect.

Feel the mojo of the Budwah and you will see why many of today's professionals rely on Budda for their signature sound.

BUDDA AMPLIFIERS & CABINETS ARE DESIGNED
AND BUILT IN THE U.S.A.

Tone is something you truly have to feel to believe. Our engineers and amp technicians not only feel it—they spend their lives elbow-deep in it, hand wiring amp chassis and cabinets and custom-fitting our trademark tailored coverings.
